

A Brief Description Of The Mobile Employee App

Employees are your most important asset. With the Mobile Employee App, you will become the **digital supporter** of your employee's daily work and also increase the profitability of your company. The Employee App realizes this without the need of major adjustments to your current IT infrastructure. Our maxim "**Mobile First**" also takes advantage of the fact, that a smartphone is now the most important device, if not the most important possession of a person.

The Mobile Employee App is a low-code development and communication platform with sophisticated mobile features, pixel perfect UX, **easy integration** and a fast provision process.

Our building block system will give you the necessary **flexibility** to act agile on changes or realize new projects easily.

Thanks to the centralized structure the app forms the focal point for **precise employee communication** on mobile devices. This will speed up workflows and create new room for maneuver.

But our app isn't just suited as a general employee app. You can split its use cases into different categories which each have their own requirements. An example would be a team app, an onboarding or preboarding program as well as an app for your non-desk personnel.

Team

To communicate and collaborate with colleagues or as a knowledge base. Achieve measurable success as well as noticeable speed-ups of existing workflows.

Non-Desk Workers

Digitize your non-desk workers for more inclusion and communication. Whether they're with a customer or inside a workshop, every staff member will be digitally involved.

Qualification

For internal education, training and talent programs, to further your staffs skill set.

Apprentices/Trainees

Support and foster your apprentices and trainees on the digital front to secure young talents for your company.

Pre- & Onboarding

Facilitate the start of your new staff members career within your company. From the moment of contract signing to their first day at work and beyond!
