

QA Engineer

(M/F/D)

What: Permanent position, full-time

When: Now

Where: Erfurt, Bahnhofstr. 5a
or also predominantly remote

You take responsibility for the internal quality assurance of our software products. You are closely involved in the development process and identify edge cases that are important for the implementation of the user stories. You check the resulting functions for compliance with our quality standards.

In doing so, you not only ensure correct functionality, but also consider usability and accessibility requirements. Wherever possible, you establish automated regression tests so that our customers can rely on the quality of our products in the long term.

WHAT YOU CAN EXPECT

- You will independently design test cases
- You will check the fulfillment of our product requirements against the test cases
- You will have to integrate regression tests into the CI pipelines
- Implement automated tests
- You will work in a young team with flat hierarchies

WHAT WE EXPECT

- Professional qualification from the field of computer science or a related field
- Agile project experience
- Knowledge of test case definition
- Experience with test automation tools
- A high quality standard
- Very good technical understanding

WHAT WE OFFER

- Participation in shaping your area of responsibility
- Opportunities to take on responsibility early, including the potential to become a team leader
