

# **JOB OFFER: INFORMATION SECURITY AND DATA PROTECTION MANAGER**

**(M/F/D)**

**What:** Permanent, full-time

**When:** Now

**Where:** Erfurt, Bahnhofstr. 5a  
or mostly remote

plazz AG is a leading technology firm for event and social intranet software. We are committed to ensuring the security and protection of our clients' and employees' data. As part of our ongoing efforts to strengthen our information security and data protection, we are seeking a highly qualified and dedicated Information Security and Data Protection Manager to join our team.

The Information Security and Data Protection Manager will be responsible for developing and implementing comprehensive information security and data protection strategies to safeguard the confidentiality, integrity, and availability of data within our organization. This role involves assessing and mitigating risks, ensuring compliance with relevant regulations, and promoting a culture of security awareness among our employees.

# WHAT YOU CAN EXPECT

- Develop and implement information security and data protection policies, procedures, and standards.
- Conduct regular risk assessments and vulnerability assessments to identify and mitigate security threats.
- Lead incident response efforts in the event of a data breach or security incident.
- Monitor and manage security measures for technologies, such as firewalls, intrusion detection systems, and encryption tools.
- Stay up-to-date with industry trends and evolving threats to ensure our security measures remain effective.
- Collaborate with internal teams to ensure compliance with data protection laws, including GDPR, and other relevant regulations.
- Provide security awareness training to employees to foster a culture of cybersecurity.
- Manage relationships with security vendors and consultants.
- Prepare and maintain security documentation, including security policies, procedures, and incident reports.
- Regularly report on the state of information security to senior management.

# WHAT WE EXPECT

- Bachelor's degree in a related field (e.g., Computer Science, Information Technology, Cybersecurity).
- Certified Information Systems Security Professional (CISSP) or equivalent certification is a plus.
- Proven experience in information security, data protection, or a related field.
- Strong knowledge of security technologies, standards, and best practices.
- Familiarity with relevant data protection regulations and compliance requirements.
- Excellent problem-solving skills and the ability to work independently and collaboratively.
- Strong communication and presentation skills.

# WHAT WE OFFER

- Young, fast growing company in the technology sector
- Scope to shape your own activities and the opportunity to take on responsibility
- Opportunity to develop with the company and grow both professionally and personally
- Attractive social benefits
